ZERO CARBON SPECIFICATIONS

WHAT IS ZERO CARBON?

A Zero Carbon Building is one that is highly energy-efficient and designed to minimize greenhouse gas emissions from both building operations and building materials.

BENEFITS OF A ZERO CARBON FACILITY

LOWER OPERATING COSTS

An enhanced building envelope paired with high-efficiency systems reduces utility consumption, lowering tenant operating costs.

HEALTHIER WORKSPACES

Improved air quality and thermal comfort enhance employee well-being and productivity.

SUPPORT FOR ESG GOALS

Supports tenants' ESG objectives while strengthening their environmental reputation and leadership in sustainability.

FUTURE PROOFING YOUR BUSINESS

Meet evolving climate and energy standards ahead of regulations, helping tenants mitigate future carbon cap risks.
